

The global leader in customized valve automation

ATI is pleased to offer our customers the proven and patented pipeline technology that the flow control industry knows as Gevalco.

LINEAR GAS-OVER-OIL ACTUATORS

Linear gas-over-oil actuators are designed for rising stem gate valve applications on natural gas pipelines, utilizing gas over oil power pressure for the actuator.

Our linear gas-over-oil actuators are ideally suited for:

- Emergency shutdown
- Line break protection
- High thrust requirements
- Gate valves or rising stem ball and globe valves
- Gate valves on product pipeline actuators powered hydraulically or nitrogen
- Spring return or fail-safe applications
